About WGM

Watts, Griffis and McOuat Limited (**WGM**) is an independent firm of consulting geologists and engineers that provides value-added professional services of the highest standards to the global mineral resource industry. From grass-roots exploration through to mine closure, our expertise in project management, mineral resource and reserve estimates, technical reports, due diligence reviews, and property valuations, has distinguished WGM as the most trusted name in exploration and mining since 1962.

Gold and Silver

We have experience with all major types of gold deposits, whether it be alluvial, vein/structurally controlled, epithermal or porphyry related. WGM's experience ranges from conducting, designing, implementing and managing grassroots exploration and drilling projects to Mineral Resource/Reserve estimates and audits and completing preliminary assessment and feasibility studies. Our track record for identifying potential economic projects for primary acquisition or assisting with mergers and valuations of projects speaks for itself.

Members of our professional staff are engaged as Independent Qualified Persons for numerous companies. We work with these companies on an ongoing basis and are involved with a variety of specialties, such as data compilation and interpretation, advice on best practices and QA/QC protocols, preparation of NI 43-101 reports, and Gemcom Whittle® optimization studies.

Key Projects

Red Lake Mine and Wharf Mine, Canada and USA - Annual Mineral Resource/Reserve audit and preparation of report

Kinross Operations, Canada, USA and Russia - Due diligence review of Kinross assets and valuation to support merger of Kinross, TVX and Echo Bay Mines
